

As Child Of Deaf Adults I choose to use Sorenson VRS because of their high quality interpreters. I am afraid that if the FCC imposes a speed of answer requirement that the quality of VRS will decrease. It is far more important that my Communication with my Parents & other Deaf Friends be clear & correct. I would rather have a longer wait than a "quick" answer followed by conversational confusion & mistakes due to unqualified interpreters. Please do not implement a speed of answer requirement at this time.
